

Framing

Keystone's buildings come with a 25-year 6 month limited rust-through perforation warranty on AZ55 Galvalume® roof panels, a limited lifetime warranty on stainless steel cap roof fasteners and the TRINAR® PVDF resin-based colored coating on the walls and trim carries a 35-year limited warranty from the paint manufacturer.

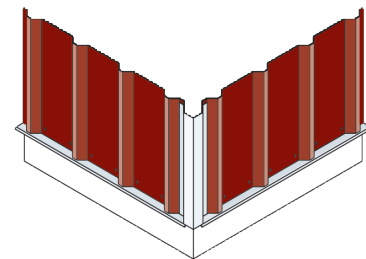

All metal buildings come standard with galvanized secondary framing and extended weather-tight PBR roof panels.

All Secondary Framing GALVANIZED

including base angle, C, E and Z members

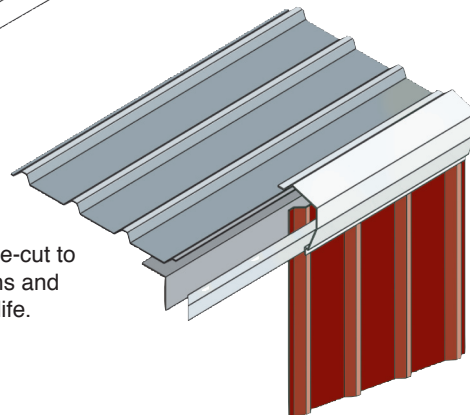

Ridge Cap
Factory formed for easy installation with a high-rib design for severe weather.

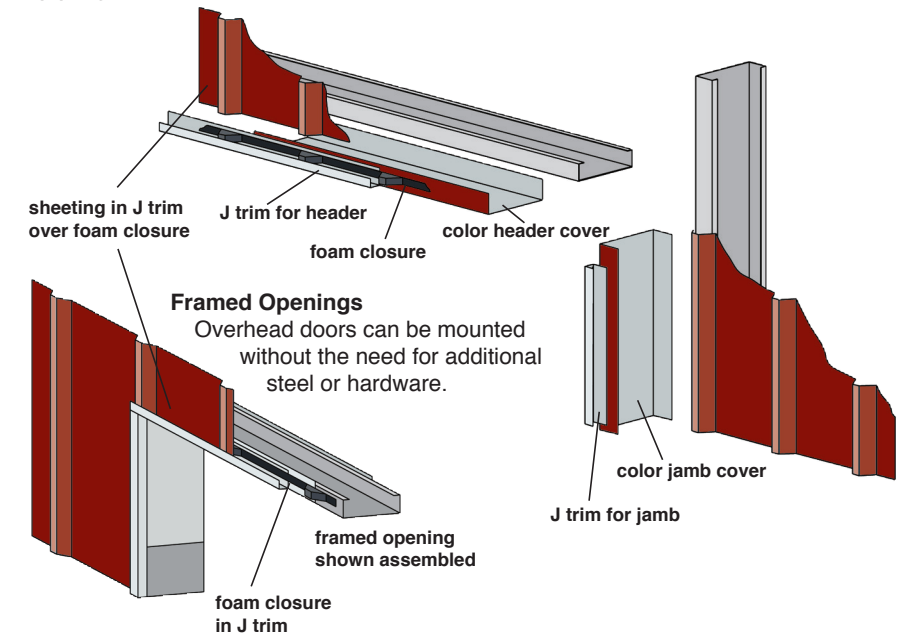

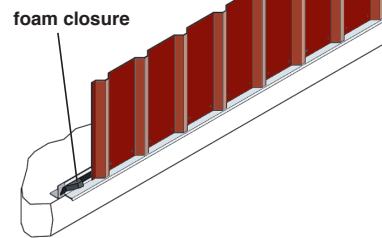

Corner Trim
1 1/4" deep rigid-rib design construction results in beauty and strength.

Roof Panels
Rigid-rib panels pre-cut to building dimensions and designed for long life.

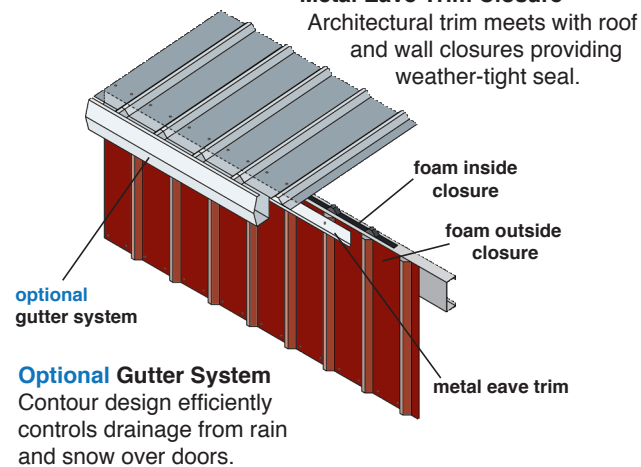

Base Trim
Provides maximum weather protection, an attractive finished appearance and long life due to a Galvalume base angle and unique design.

Cut-Away View
Showing roof panels, wall panels, purlins, optional gutter system, rafter and sidewall column.

Metal Eave Trim Closure
Architectural trim meets with roof and wall closures providing weather-tight seal.

Optional Gutter System
Contour design efficiently controls drainage from rain and snow over doors.

Every Keystone building comes standard with all items shown, unless noted as optional.
